**ORDER OF THE HEALTH OFFICER OF THE COUNTY OF ALPINE
DIRECTING ALL PUBLIC MEETINGS IN THE COUNTY TO OCCUR
VIRTUALLY UNTIL FURTHER NOTICE AND ENCOURAGING
WORKPLACES TO CONDUCT MEETINGS REMOTELY AS BUSINESS NEEDS
PERMIT**

DATE OF ORDER: January 10, 2022

BACKGROUND

The rapid emergence of the highly transmissible COVID-19 Omicron variant coupled with holiday gatherings has led to unprecedented COVID-19 case rates in Alpine County. Instead of several cases every 1-2 weeks, we are now experiencing several new cases per day, and have moved from being the only county in California considered "low risk" into the highest risk category. Those affected include those most vulnerable – the very young, the elderly, those with underlying medical conditions, and those unvaccinated or incompletely vaccinated.

While data on the Omicron variant is still emerging, it has quickly become the dominant variant in the United States. The high case rates in our region are projected to severely impact capacity in area hospitals over the next weeks.

All individuals in Alpine County, especially those who are unvaccinated or not up-to-date with their vaccination (boosted, if eligible) and those at higher risk of severe outcomes from COVID-19, should take personal measures to reduce their risk of acquiring COVID-19. In addition to existing COVID-19 mitigation measures, including vaccination, face coverings, and testing, additional actions can help limit the likelihood of COVID-19 transmission in workplaces and public settings.

This Order is necessary to control and reduce the rate of community spread and to reinforce the need for safe interactions. The Health Officer will continue to assess the public health situation as it evolves and will reevaluate the need for this Order no later than February 1, 2022. The Health Officer may modify this Order, or issue additional Orders related to COVID-19, as changing circumstances dictate.
